The last few years have been particularly challenging for the Indian economy. Consider this :

- ⌘ **Subdued GDP growth**
- ⌘ **Sustained high inflation**
- ⌘ **Plummeting currency**

Challenges in the economy have been compounded by challenges in the auto industry.

Consider this :

- ⌘ **Domestic Three wheeler sales were down by 11 per cent**
- ⌘ **Domestic Sales of Commercial Vehicles were down by 20 per cent**
- ⌘ **Labour costs increased by 12 per cent**

Multiple challenges in the economy and industry have weighed down heavily on the automobile industry, with most players struggling to cope with falling sales and falling margins.

Not many have been able to overcome these challenges.

At Atul Auto, we have always viewed challenges as opportunities. We have always believed that perseverance and persistence prevail over problems. And that is why, in spite of daunting challenges, we have delivered yet another sterling performance :

At Atul Auto,
our determination and dedication, our faith and focus, our resilience
and resources and our experience and expertise have ensured that
we are

Corporate Snapshot

Atul Auto is one of the youngest players in the 3 wheeler business with humble beginning in 1992 that started with manufacturing of Chhakaras (Rural Transportation Vehicle - RTV) – customised multi-purpose vehicles typical to the Saurashtra region in Gujarat, which over a period of time became the identity of Saurashtra.

The Company has been promoted by the Chandra and Patel families and has emerged as one of the fastest growing 3 wheeler companies in the country, capturing both market share and investor imagination alike.

The Company's strength has been its consistent delivery – enduring product and efficient services, which has made it a serious competitor to the domestic and MNC giants.

With a well-diversified product portfolio consisting of 45 models and variants, an extremely strong brand, integrated manufacturing plant and presence across key regions, Atul Auto is today the fastest growing 3 wheeler player in India.

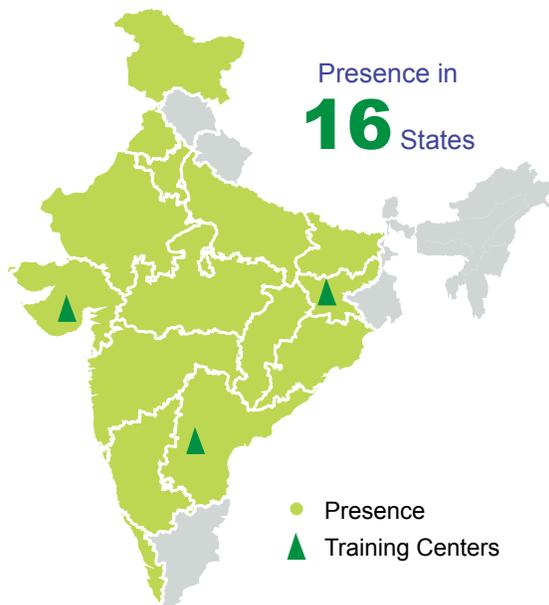

Vision

To contribute towards making the common people self-reliant, with our state of art technology, products and services.

Manufacturing

- ✦ Integrated plant located at Shapar in the Rajkot district of Gujarat
- ✦ Installed capacity of 48,000 vehicles per annum
- ✦ Machining of components, fabrication of chassis, state of art pre-paint and final paint facilities, assembly of 3 wheelers and end-of-line testing all under one roof.
- ✦ Human Assets of 1000

Message from the Chairman and Managing Director

It is always a pleasure and privilege to share with you how our Company performed during last fiscal and its future plans and direction.

Dear Shareholders,

It is always a pleasure and privilege to share with you how our Company performed during last fiscal and its future plans and direction.

It has been yet another outstanding year for the Company, with significant and impressive growth in both the top-line and the bottom line. This was achieved through relentless focus on improving efficiency in operations, higher customer-engagement and untiring marketing efforts. I am sure you will like to join me as I congratulate every member of the Atul Auto family for proving yet again that with passion, enthusiasm, confidence and commitment, Atul Auto has been **RISING WITH EVERY CHALLENGE**.

The year 2013-14 had more than its share of challenges, both on the macro-economic front as well as within the industry. All the major economies of the world continued to struggle and underperform. In India, growth remained sluggish due to high inflation and weakening currency. These factors led to a tight monetary policy with high interest rates, and consequently, higher costs of capital, thus depressing demand and dampening growth across industries. The auto-industry has been under severe pressure for the last two years due to slack demand. The domestic three-wheeler segment was also affected, with volumes reducing by as much as 60,000 units for the year 2013-14 compared to the previous year. Add to this lower demand were increasing costs – raw materials, wages, energy and cost of finance all increased during the year, making it one of the most challenging year.

At Atul Auto, notwithstanding these challenges, but **RISING WITH EVERY CHALLENGE**, we delivered yet another excellent performance:

We have always been focussing on aligning our products to meet the needs of the market. In line with this, we launched Atul Gemini in the 350 kg. payload capacity powered by diesel engine in the month of May 2013. With this launch Atul Auto will be able to address all together a new segment in the 3 Wheeler industry. As proved in the past any new product launched by Atul Auto has always attained a grand success.

Looking ahead, I am optimistic that both the economy and the industry are heading for brighter days. The new government has inspired fresh hope, reflected in surging stock markets. Globally too, key economies are expected to pick up in 2014-15. The auto industry is also expected to revive demand and growth. These factors augur well for Atul Auto, and we are quite confident of reaping benefits as we emerge as a serious PAN India player in the industry.

I thank you for your sustained faith and constant support in Atul Auto, and assure you we are on a strong trajectory of growth and success.

Chairman and Managing Director

Rising with every challenge

Our journey began in Gujarat in 1992 with a small but confident step. Soon after exploring the rural market with RTV - Khushbu, the R & D team sensed that customers' preference was changing and accordingly, the first ever 0.5 tonner was developed and launched during the year 2000 for cargo and passenger applications more suitable for Gujarat and the neighbouring state Rajasthan.

The value offering and high quality standard helped the Company achieve market leadership in Gujarat in quick time.

We launched Atul Gem

With Atul Gem, we had the right product to enter the mainstream 3 wheeler markets dominated by RE models. What followed was a period of exponential growth – in volumes, in value, in reach and product range.

Volumes

Atul Gem was an unprecedented success, and swiftly garnered a major share of the RE market with its rugged structure and body-strength, its fuel-efficiency and its compelling savings in costs. With this huge surge in demand came the next set of challenges : to increase capacity and to expand reach.

We leveraged the power of re-engineering and local level shop-floor innovation. We focussed on execution and improving our operational efficiencies. The result – We increased our capacity from 24,000 units to 36,000 units in FY 2013 to 48,000 units in FY 2014.

Geographic Reach

As we expanded our capacity to meet the rising demand, we also had to widen our geographic reach to service new customers in new markets. We did this through a relentless drive of building a nation-wide network of dealers and service centres across key clusters and consumption hubs of the country.

A Product for every user and every need

Meeting the needs of the market has been an integral and important part of our overall growth story. We understand the typical needs and specific requirement of every end-user, be it a fleet-owner or a FMCG giant or an individual passenger auto-rickshaw owner.

In a developing economy where the per capita income is low, demand is for economic transport solution and none other than a 3 wheeler can deliver such value. At Atul Auto, we have focused on higher and speedy

By 2009, we had dominated the FE market and were now looking at the larger RE market. The challenge was to evolve capability and capacity, branding and marketing to manufacture RE vehicles that would appeal to the PAN Indian market.

We took the strategic decision – to enter the RE segment. This was the beginning of the RISING at Atul Auto.

return on investment for the end user with efficient pre, at and after sale service.

Platform to keep RISING

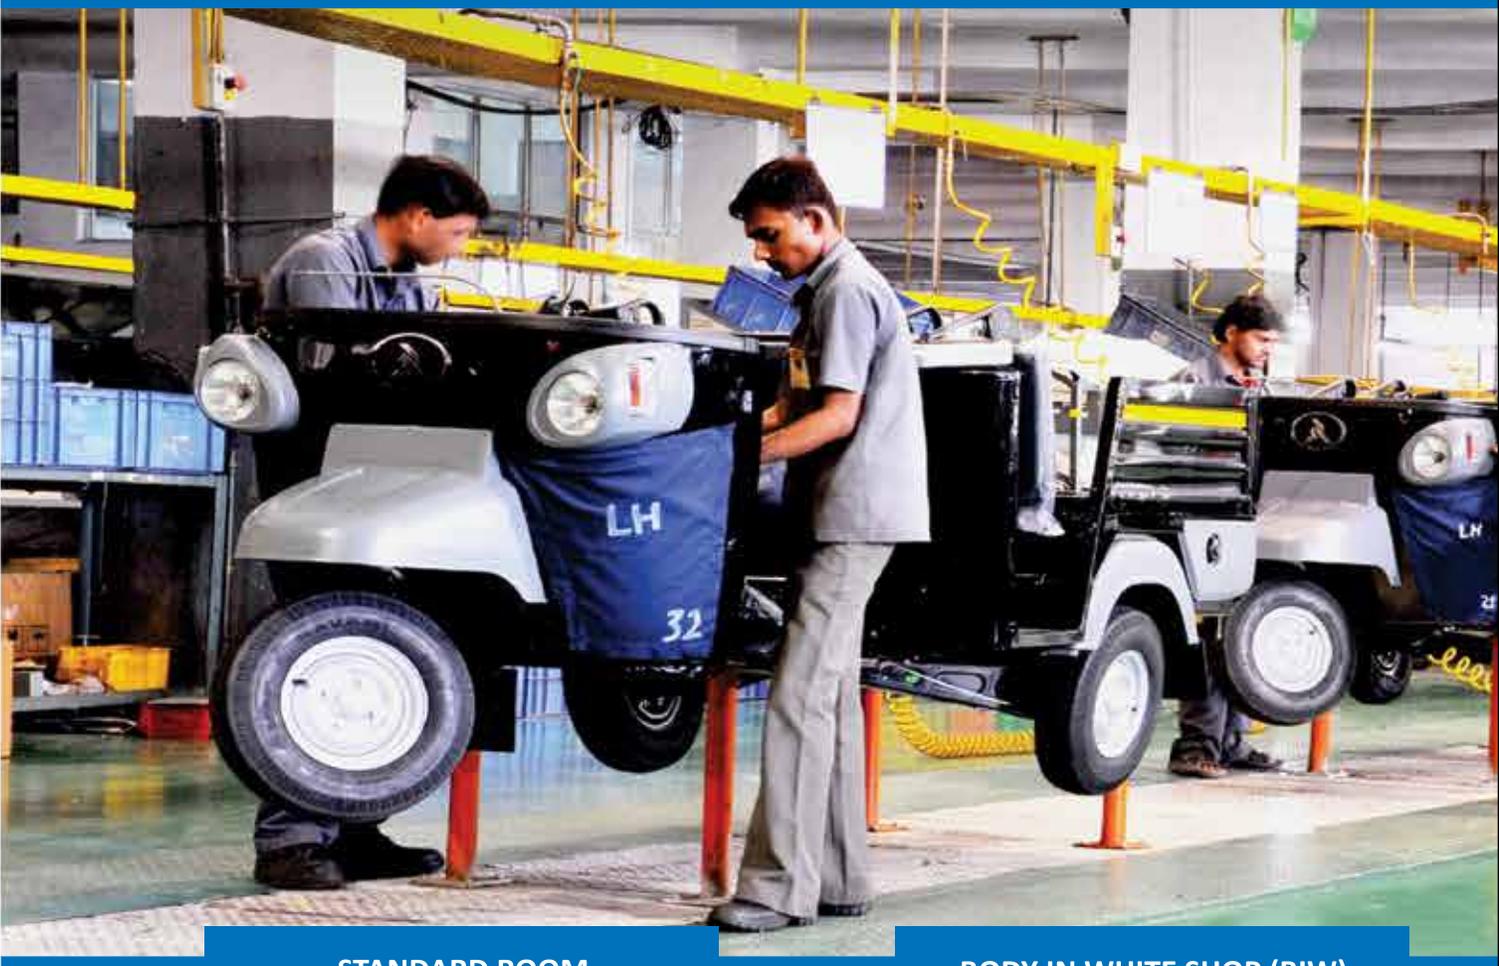

At Atul Auto, we believe that RISING WITH EVERY CHALLENGE that we have demonstrated has been achieved through a well-thought strategy matched with relentless execution. This has provided us with a unique platform for future growth.

Another critical factor that will propel our RISING in the future is our people. We believe we have some of the best talent in the industry. Most of our employees share a strong bond of affinity and loyalty with the Company and have been with us for long years. We have the best-in-class HR policies that ensure they achieve their potential. Our attrition rates are among the lowest in the industry.

To lead the next Company into the future, we have a strong and capable second line of generation ready. It is our young, dynamic and professional young leaders, grounded in values and highly ambitious who will take us to the next level as we continue

Management Discussion and Analysis

Economic Overview

The year 2013 was another year when growth was difficult to come by in all the major economic regions. According to the International Monetary Fund's World Economic Outlook published in April 2014, world output for 2013 grew at 3.0 per cent compared to 3.2 per cent in 2012, marred by underperformance in both developed as well as emerging economies. There was a marked improvement in the latter six months of the year which saw a pick-up in growth amongst driven largely by the developed countries

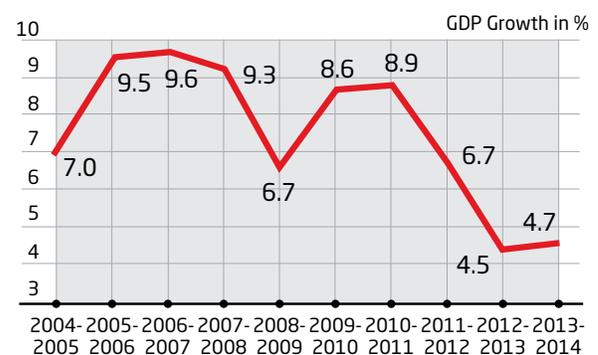

The world's largest economy, The USA, could not manage to keep up with the momentum of growth it achieved in 2012. In the year 2013, the U.S. grew at a meagre 1.9 per cent compared to 2.8 per cent in 2012, mainly due to policy gridlocks. There was some positivity in the euro zone as it finally emerged from protracted recession. The output in euro zone was 0.5 per cent in 2013 compared to 0.7 per cent in the previous year.

In the emerging economies of Asia, both China and India continued to face new headwinds. China seemed to have back-stopped fall in output as it eventually managed to grow at 7.7 per cent in 2013, maintaining the 7.7 per cent growth it achieved in 2012. Even though this appears low, it is still a significantly robust growth rate when compared to growth in other developed economies.

In India, 2013 was the second consecutive year of a sub-five per cent growth for the economy. For the fiscal year 2013-14, GDP growth was 4.7 per cent, only marginally better than the 4.5 per cent in the previous fiscal year. As in case of other major economies, the Indian economy too showed a remarkable pick-up in growth in the second half of the year. The key factors that weighed down growth were sustained inflation and a weakening local currency. The central bank could not reduce interest rates to keep inflation under check, which made cost of capital and interest high throughout the year. On the other hand, the alarming fiscal deficit resulted in the Indian rupee plunging to its lowest of 68.85 against the US Dollar in the month of August. Most industries, particularly real-estate, infrastructure and automobiles witnessed slowdown due to low consumer confidence that affected sales, as well as high input costs that pressurised margins.

However, there was a positive development in the month of April 2014, when India overtook Japan as the world's third largest economy in terms of PPP, as per report by the World Bank.

Industry Overview

An underdeveloped infrastructure and transportation system coupled with inadequate facilities supply of public transportation and , rapid and improving road infrastructure has been contributing to the growth of three wheelers in these countries where Asia-Pacific, accounted for 65%, in volume terms, of the global three-wheeler market in 2013.

The Indian automobile industry has been growing at a remarkable rate over the years, contributing approximately 7 per cent to the country's GDP and employing about 19 million people (KPMG). However in recent years, it has been going through challenging times with both production and domestic sales declining due to weakening economic sentiments caused by the slowing economy, volatile fuel prices and expensive loans.

India is one of the largest manufacturers of three-wheelers in the world with an estimated production of 850,000 units annually. Of these, almost 500,000 units are sold in the domestic market, with exports comprising the balance 350,000 units. Three-wheelers play an important part in transporting both passengers as well as goods, providing a cost-effective alternative for last mile connectivity in both urban cities as well as rural towns of the country. With easier permits available for CNG/LPG vehicles, three-wheelers are proving emerging as a popular alternative for both personal and mass transportation needs.

According to latest data released by Society of Indian Automobile Manufacturers (SIAM), domestic three-wheeler sales in India fell by approximately 11 per cent over for the fiscal year 2013-14 compared to the 2012-13. Segment-wise, Passenger Carrier vehicles bore the major brunt of the slowdown, with sales falling to 384, 923 units for 2013-14 compared to 441, 124 units in the previous year, a 12.74 per cent decrease. The Goods Carrier segment did comparatively well, with sales falling from 97,166 units in 2012-13 to 94,711 units in 2013-14, a marginal decrease of 2.53 per cent. Key factors that weighed down sales were high interest rates, inflation and fuel prices. The overall economic slowdown also adversely affected consumer confidence and demand.

Outlook

The outlook for the Indian automobile sector is positive. The sector is expected to resurge in 2014 on the back of revival in demand both from consumers as well as industry. Driven by a renewed confidence in the economy and a general improvement in liquidity and sentiments, demand is expected to rise as early as in the first quarter

of FY 2014. The industry estimates demand to pick up to 5 per cent in the year 2014-15 and return to double digit demand in the year 2015-16. The industry is further hopeful that the new government will favourably consider reduction of excise duty, which would result in unlocking middle-class demand.

Risk and Concerns

This section contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these statements as a result of certain factors. The following lists our outlook, risks and concerns:

- Our revenues and expenses are difficult to predict and can vary significantly from period to period, which could cause our share price to decline. We may not be able to sustain our previous profit margins or levels of profitability.
- The economic environment, pricing pressure could negatively affect our revenues and operating results.
- Any inability to manage our growth could disrupt our business and reduce our profitability.
- We may face difficulties in procuring raw material at competitive prices because of our size compared to competitors and therefore may have bore the brunt of fluctuating commodity prices .
- Our success depends in large part on our management team and key personnel and our ability to attract and retain them.
- Compliance with new and changing corporate governance and public disclosure requirements adds uncertainty to our compliance policies and increases our costs of compliance.
- We may engage in acquisitions, strategic investments, strategic partnerships or alliances or other ventures that may or may not be successful.
- We may be the subject to litigation which, if adversely determined, could harm our business and operating results.

Wage pressures and the hiring of employees may prevent us from sustaining our competitive advantage and may reduce our profit margins.

Independent Auditors' Report

To
The Members of
ATUL AUTO LIMITED

Report on the Financial Statements

We have audited the accompanying financial statements of Atul Auto Limited ('the Company'), which comprise the Balance Sheet as at March 31, 2014, and the Statement of Profit and Loss and Cash Flow Statement for the year then ended and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation of these financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the Accounting principles accepted in India. This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due

to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India:

- (a) In the case of the Balance Sheet, of the state of affairs of the Company as at March 31, 2014;

Significant Accounting Policies and Notes on Financial Statements

1 NATURE OF OPERATIONS

Atul Auto Limited, incorporated on 18-06-1986 is a manufacturer of Three Wheeler Auto Rickshaw (Passenger / Loading) and its spare parts. It produces Auto Rickshaw under Atul Shakti, Atul Gem, Atul Smart & Atul Gemini brand names. The Company is also engaged in the generation of Electricity with Wind Turbine Generator at Village Gandhavi, Gujarat.

2 BASIS OF PREPARATION

The financial statements have been prepared to comply in all material respects with the standards notified under the Companies (Accounting Standards) Rules, 2006 and the relevant provisions of the Companies Act, 1956. The financial statements have been prepared under historical cost convention on an accrual basis except in case of assets for which provision for impairment is made. The accounting policies have been consistently applied by the Company and except for the changes in accounting policy discussed more fully below, are consistent with those used in the previous year.

2.1 SIGNIFICANT ACCOUNTING POLICIES

[a] Use of estimates

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent liabilities on the date of the financial statements and the reported amounts of revenues and expenses during the period reported. Actual results could differ from those estimates. Any revision to accounting estimates is recognised in accordance with the requirements of the respective accounting standard.

[b] Inventories

Inventories are valued as follows:

Raw materials, components, stores and spares

Lower of cost and net realizable value. However, materials and other items held for use in the

production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost. Cost is determined on a FIFO basis. Cost includes relevant cost of bringing those material at their present location and condition.

Work-in-progress and finished goods

Lower of cost and net realizable value. Cost includes Direct Materials and Labour and a proportion of Manufacturing Overheads based on normal operating capacity or actual production whichever is less. Cost of finished goods includes excise duty.

Net Realizable Value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale.

[c] Events occurring after Balance Sheet date

Material events occurring after the date of balance sheet are recognized and are dealt with appropriately in accordance with generally accepted accounting principles and as provided in AS-5

[d] Depreciation

Depreciation is provided using the Straight Line Method as per the rates prescribed under schedule XIV of the Companies Act, 1956 except in case of :

Leasehold Land - amortised over the period of the lease.

Intangible Asset - Amortised over a period of 5 years as estimated by the management.

[e] Revenue Recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.

Sales of Goods

Revenue is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer. Excise Duty included in the amount of turnover (gross) are deducted from turnover (gross) for disclosure of net turnover in the P&L account.

Interest

Revenue is recognised on a time proportion basis taking into account the amount outstanding and the rate applicable.

Dividends

Revenue is recognised when the company's right to receive payment is established by the balance sheet date.

[f] Fixed Assets

Fixed assets are stated at cost, less accumulated depreciation and impairment losses. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for its intended use, net of CENVAT recoverable. Financing costs relating to construction of fixed assets are also included to the extent they relate to the period till such assets are ready to be put to use. Financing costs not relating to construction of fixed assets are charged to the income statements.

[g] Foreign currency transactions

(i) Initial Recognition

Foreign currency transactions are recorded in the reporting currency, by applying to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

(ii) Conversion

Foreign currency monetary items are reported using the closing rate.

(iii) Exchange Differences

Exchange differences arising on the settlement of monetary items or on reporting monetary items of company at rates different from those at which

they were initially recorded during the year, or reported in previous financial statements, are recognised as income or as expenses in the year in which they arise.

[h] Investments

Investments that are readily realisable and intended to be held for not more than a year are classified as current investments. All other investments are classified as long-term investments. Current Investments are carried at lower of cost and fair value determined on an individual investment basis. Long term investments are carried at cost, less provision for diminution in value other than temporary.

[i] Employee Benefits

Gratuity

The Gratuity Liability is defined benefit obligation. The company has created Employees Group Gratuity Fund which has taken a Group Gratuity Insurance Policy from Life Insurance Corporation of India (LIC). Premium on above policy as intimated by LIC is charged to the Profit & Loss Account. The adequacy of balances available is compared with actuarial valuation obtained at the period end. Shortfall, if any, is provided for in the Profit & Loss Account.

Provident Fund

Retirement benefits in the form of Provident fund is a defined contribution scheme in which both employees and the Company make monthly contributions at a specified percentage of the covered employees' salary (currently 12% of employees' salary). The contribution are charged to the profit and loss account of the year when the contribution to the respective funds are due.

Leave Salary

The Company provides for the encashment of leave or leave with pay subject to certain rules. The employees are entitled to accumulate leave subject to certain limits, for future encashment. The liability is provided based on the number of days of unutilised leave at each balance sheet date.

[j] Borrowing Cost

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised as part of the cost of that asset. Other borrowing costs are recognized as an expense in the period in which they are incurred.

[k] Segment Reporting

The company is engaged mainly in the business of automobile products. These, in the context of Accounting Standard 17 on Segment Reporting, as specified in the Companies (Accounting Standard) Rules, 2006, are considered to constitute one single primary segment. Further, there is no reportable secondary segment i.e. Geographical segment.

[l] Earning Per Share

Basic earning per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Partly paid equity shares are treated as a fraction of an equity share to the extent that they were entitled to participate in dividends relative to a fully paid equity share during the reporting period.

[m] Income Taxes

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the provisions of the Income Tax Act, 1961.

Deferred tax is recognised, on timing differences, being the difference between taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods.

[n] Intangible assets

Product Development Cost

Product Development Cost incurred on new vehicles platforms, variants on existing platforms and new vehicles aggregates are recognized as intangible assets and are included under fixed assets. These amounts are amortized over sixty months from the commencement of commercial production i.e. from June 1, 2009.

SAP Implementation Charges

Expenses incurred for implementation of SAP are recognized as intangible assets and are included under fixed assets. The amounts are amortized over sixty months from the implementation of SAP i.e. from January 1, 2012

[o] Impairment

The carrying amounts of assets are reviewed at each balance sheet date if there are impairment indicators. An impairment loss is recognized wherever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the greater of the asset's net selling price and value in use.

After impairment, depreciation is provided on the revised carrying amount of the asset over its remaining useful life.

A previously recognised impairment loss is increased or decreased based on reassessment of recoverable amount, which is carried out if the change is significant. However the carrying value after reversal is not increased beyond the carrying value that would have prevailed by charging usual depreciation if there was no impairment.

[p] Provisions

A provision is recognised when an enterprise has a present obligation as a result of past event; it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provision are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

[q] Product Warranty Expenses

The estimated liability for product warranties is recorded when products are sold. These estimates are established using historical information on the nature, frequency and average cost of warranty claims and management estimates regarding possible future incidence based on corrective actions on product failures. However any risk covered by insurance policy premium paid on such policy are charged to revenue in the year in which it is incurred.

B. PROVISION FOR GRATUITY

The company has a defined benefit gratuity plan. Every employee who has completed five years or more service gets a gratuity on departure at 15 days salary (last drawn salary) for each completed year of service. The scheme is funded with an insurance company in the form of a qualifying insurance policy.

The following table summaries the components of net benefit expense recognized in the profit and loss account and the funded status and amounts recognized in the balance sheet for the respective plans.

	31-03-2014		31-03-2013

D. PROVISION FOR WARRANTIES

A provision is recognized for expected warranty claims for ATUL SHAKTI & ATUL SMART sold for last 6 months and for ATUL GEM & ATUL GEMINI sold for last 24 months based on past experience of the level of repairs and returns. It is expected that significant portion of these costs will be incurred in the next financial year. Assumption used to calculate the provision for warranties were based on current sales levels and current information available about returns based on the warranty period for all products sold. The table given below gives information about movements in warranty provisions.

At the beginning of the year	11,303,310		7,250,212	
Arising during the year	15,736,722		17,781,199	
Utilised during the year	-14,203,269		-13,728,101	
At the end of the year		12,836,763		11,303,310

E. PROVISION FOR AFTER SALES SERVICES & WRC

At the beginning of the year	8,023,988		6,898,888	
Arising during the year	20,181,699		17,516,726	
Utilised during the year	-19,379,187		-16,391,626	
At the end of the year		8,826,500		8,023,988

Provision for After Sales Service is made on the basis of estimation of balance of unutilised service coupon proportionate to the balance of free service period.
